

Join the fight against invasive species and protect our fisheries resources!

Our fisheries are being threatened by invasive creatures that damage habitat and natural resources. Simple steps can be taken to reduce the spread and introduction of harmful invaders.

- Inspect your gear for any plants or dirt, and remove
- Clean your gear with clean water
- Thoroughly dry your gear
- Never transport any fish, plants, or animals from one body of water to another
- Tell others to do the same!

Join the Federation of Fly Fishers and countless dedicated anglers in the fight against invasive species and take the Clean Angling Pledge today!
